

AmeriHealth Caritas[™]
District of Columbia

To: AmeriHealth Caritas DC Providers
Date: October 1, 2026
Subject: Generic Statins Included on 90-Day Maintenance Medication List

Dear Provider,

AmeriHealth Caritas District of Columbia (DC) is reaching out to support your efforts to improve medication adherence for enrollees with diabetes and cardiovascular disease, in alignment with the HEDIS measures:

- Statin Therapy for Patients with Diabetes (SPD)
- Statin Therapy for Patients with Cardiovascular Disease (SPC)

As part of our quality improvement initiatives, we would like to remind you that generic statins are included on the 90-day maintenance medication list. Prescribing 90-day supplies for ongoing statin therapy may help:

- Improve medication adherence
- Reduce gaps in therapy and missed doses
- Support improved medication adherence, as reflected in HEDIS statin adherence performance (≥80%)

We encourage consideration of 90-day dispensing for eligible enrollees receiving maintenance statin therapy, when clinically appropriate.

If you have any questions, please reach out to the Quality Management Department at dladcqualitymanagement@amerihealthcaritas.com.

Thank you for your continued partnership in improving diabetes and cardiovascular outcomes for our enrollees.

Sincerely,
Quality Management Department
AmeriHealth Caritas DC
