

AmeriHealth Caritas™
District of Columbia

To:	All AmeriHealth Caritas DC Providers
Date:	September 10, 2021
Subject:	Presumptive and Definitive Drug Testing Payment Policy
Summary:	Effective October 15, 2021, when a definitive drug testing code and a presumptive drug testing code by instrumented chemistry analyzers (80307) are reported on the same date of service for the same enrollee by the same independent clinical laboratory, the Plan will only reimburse for the presumptive test and will not allow separate reimbursement for the definitive drug testing code.

AmeriHealth Caritas District of Columbia (DC) allows reimbursement of medically necessary presumptive and definitive drug testing when applicable codes are submitted.

When a definitive drug testing code for “any number of drug classes” (HCPCS Level II) is reported with a definitive drug testing code for a specific number of drug classes, only the “any number of drug classes” definitive drug testing code (G0659) will be eligible for reimbursement.

When a definitive drug testing code and a presumptive drug testing code by instrumented chemistry analyzers (80307) are reported on the same date of service for the same enrollee by the same independent clinical laboratory, the Plan does not allow separate reimbursement for the definitive drug testing code.

The codes applicable to this policy are below.

Related Codes

80305	Drug test(s), presumptive, any number of drug classes, any number of devices or procedures; capable of being read by direct optical observation only, includes sample validation when performed, per date of service	Reimbursed
80306	Drug test(s), presumptive, any number of drug classes, any number of devices or procedures; read by instrument assisted direct optical observation, includes sample validation when performed, per date of service	Reimbursed
80307	Drug test(s), presumptive, any number of drug classes, any number of devices or procedures; by instrument chemistry analyzers (e.g., utilizing immunoassay [e.g., EIA, ELISA, EMIT, FPIA, IA, KIMS, RIA]), chromatography (e.g., GC, HPLC), and mass spectrometry either with or without chromatography, (e.g., DART, DESI, GC-MS, GC-MS/MS, LC-MS, LC-MS/MS, LDTD,	Reimbursed

	MALDI, TOF) includes sample validation when performed, per date of service	
80320-80374, 83992	Drug test(s), individual types	Not reimbursed
80375-80377	Drug(s) or substance(s), definitive, qualitative or quantitative, not otherwise specified	Not reimbursed
G0480	Drug test(s), definitive, utilizing (1) drug identification methods able to identify individual drugs and distinguish between structural isomers (but not necessarily stereoisomers), including, but not limited to, GC/MS (any type, single or tandem) and LC/MS (any type, single or tandem and excluding immunoassays (e.g., IA, EIA, ELISA, EMIT, FPIA) and enzymatic methods (e.g., alcohol dehydrogenase)), (2) stable isotope or other universally recognized internal standards in all samples (e.g., to control for matrix effects, interferences and variations in signal strength), and (3) method or drug-specific calibration and matrix-matched quality control material (e.g., to control for instrument variations and mass spectral drift); qualitative or quantitative, all sources, includes specimen validity testing, per day; 1-7 drug class(es), including metabolite(s) if performed	Reimbursed
G0481	Drug test(s), definitive, utilizing (1) drug identification methods able to identify individual drugs and distinguish between structural isomers (but not necessarily stereoisomers), including, but not limited to, GC/MS (any type, single or tandem) and LC/MS (any type, single or tandem and excluding immunoassays (e.g., IA, EIA, ELISA, EMIT, FPIA) and enzymatic methods (e.g., alcohol dehydrogenase)), (2) stable isotope or other universally recognized internal standards in all samples (e.g., to control for matrix effects, interferences and variations in signal strength), and (3) method or drug-specific calibration and matrix-matched quality control material (e.g., to control for instrument variations and mass spectral drift); qualitative or quantitative, all sources, includes specimen validity testing, per day; 8-14 drug class(es), including metabolite(s) if performed	Reimbursed
G0482	Drug test(s), definitive, utilizing (1) drug identification methods able to identify individual drugs and distinguish between structural isomers (but not necessarily stereoisomers), including, but not limited to, GC/MS (any type, single or tandem) and LC/MS (any type, single or tandem and excluding immunoassays (e.g., IA, EIA, ELISA, EMIT, FPIA) and enzymatic	Reimbursed
